Emergency Service 24/7

ACSI received an emergency call during the last cold spell, for a large facility reporting a lack of heat.

We arrived at the jobsite within the hour and assessed the situation. We found that the heat exchanger was the source of the problem and needed to be replaced.

Our technicians worked quickly to repair the heat exchanger as a temporary solution to get heat back into the facility.

Within the next few days, we received and installed a new heat exchanger to ensure safety and comfort for the employees and workers.

Call us when you have an emergency.

Who will win it all?

Frank from ACSI thinks it will be between Kansas and Duke. *Do you agree?*

Email us info@acsigroup.com with your final pick. We'll tally the results and announce in next month's newsletter if you were right or are you 'mad'!

Air Conditioning Madness!

It's just about that time to dust off the air conditioning system. ACSI has put together a special checklist of services to help you maximize the reliability of your system and energy savings. **Be ahead of the game and schedule your appointment now.**

COMPRESSORS

Test the lubricating oil for contaminants and check crankcase oil level.

MOTORS

Check the wiring connections, motor windings & bearings.

MOTOR CONTROLS

Inspect starter contacts, terminal connections, mechanical interlocks, and timing devices. Ensure that the motor overload protection device is properly sized and functional.

OPERATING AND SAFETY CONTROLS

Determine that the controls are properly calibrated and in proper working order.

REFRIGERANT CIRCUITS

Check for proper refrigerant charge. Be sure the circuit is equipped with a moisture/sight glass indicator. Check the expansion valve "superheat" adjustment.

CONDENSERS AND EVAPORATORS

Clean heat transfer surfaces. Check and clean the cooling towers.

PUMPS

Check the bearings, packings, shaft couplings, and seals.

FANS & BLOWERS

Lubricate motors and bearings. Replace filters and drive belts. Clean the blower wheel blades.

PIPING

Check all piping and supports.
