FOR IMMEDIATE RELEASE

AMERICAN COMBUSTION SERVICE INC., (ACSI GROUP) RELEASES NEW BOILER / BURNER AUDIT TO EXPAND UPON 'GREEN' EFFICIENCIES AND SAVINGS

ACSI's Preventative Maintenance Program includes the inspection of the boiler and burner with new audit.

Mokena, IL, June 26, 2008 American Combustion Services, (ACSI) today announced a major new program that will provide much-needed energy analysis to large facilities at a time when they need it most. The new Boiler / Burner Audit is aimed at facilities engineers who have thought to have maximized their energy efforts and are now at a critical point in proving additional cost savings to executive management.

This initiative comes at a critical time when energy costs are at record levels. "Since our Green Awareness Certification in April 2008, American Combustion Service, Inc. has modified our Boiler/Burner Audit in order to expand upon Green energy analysis and cost savings," said Frank Lacny, president of American Combustion Services Inc. "Customers who subscribe to our Preventative Maintenance Program automatically receive the Burner/Boiler Audit and as a result have found significant cost savings."

American Combustion has an extensive Boiler / Burner Audit that tracks and measures many areas such as::

O₂

CO₂

CO

NO_x

SO₂

Flame Signal

Operating Pressure/Temperature

Stack Heat Loss...**and other key indicators that are custom to your application.**

The actual Boiler / Burner Audit can be reviewed with an ACSI professional. The Company can provide detailed descriptions that can be utilized for business justifications for executive management.

To participate in ACSI's Boiler / Burner Audit, or to gain additional information on ACSI's products and services, contact Frank Lacny at 773.737.9200 or email to flacny@acsigroup.com. Visit American Combustion Services Inc. online at www.ACSIGroup.com.
