ACSI Celebrates 25 Years of Success

Family members, the Mayor of Mokena and Trustees, Mokena Chamber of Commerce, Local Pipefitters Union Representatives, Mechanical Contractors Representatives and many more came to ACSI's new home in Mokena for a "25 Years in Business" success celebration, along with a tour of the new facility.

To mark the occasion, the Mokena Chamber of Commerce began the afternoon with a ribbon cutting ceremony as many watched the momentous occasion. "It isn't often that a business moves within the same town," (From Mokena.....to Mokena).....said Frank Lacny. "The Village of Mokena has been good for businesses and has been especially good for mine."

After a short speech given by Frank Lacny himself, the party went into full swing. Laughter, drinks and a few "thank you's" marked the end of 25 years and the start of another 25.

"Gaining Efficiencies with a Boiler OR Burner Replacement"

Many of you have visited our website to download this critical document that has helped many companies save on energy and gain efficiencies. We appreciate your trust in our efforts to help you.

If you would like this white paper, but don't have time to download it, just let us know, and we'll send a copy out to you. **Contact us at 773.737.9200.**

Visit us online at:
www.ACSIGroup.com/boiler_burner.aspx to download the white paper.

Begin saving right away this fall.....It's not too late!

Furnace, Boilers & Burner Repair

Now that we're beginning to search for our winter jackets, you can bet that your furnaces, boilers and burners are starting to work hard.

Perhaps you've heard unusual noises or unsure if your system is working efficiently..... contact us right away so your system can be serviced (Tuned up) and prepared for the real cold weather.

If you are thinking of "upgrading" your boiler or burner, ACSI has developed a questionnaire that has helped many companies make that decision...and how fast a return on your investment can be realized!

We can help you gather the information right on site or you can fill in the information on our website. We'll present a report back to you with your own unique results. If your situation can show a gain in efficiencies and save energy costs, this form, when presented to your management can help you prove a short return on the investment.

There's only one thing you can lose by not testing the efficiency of your system...Money.
